New Vision New Life™

## Customised Lasik

### WHAT IS LASIK?

Lasik simply means using a laser to change the shape of the cornea.

It is a procedure to restore your distance vision by correcting your short-sightedness, long-sightedness and astigmatism. This is achieved by reshaping your cornea using a cool Excimer laser.

#### How long does the procedure take? Is it safe?

Laser procedures usually take our highly experienced surgeons less than 30 minutes to complete. Excimer lasers will not produce heat nor penetrate the corneal surface. Thus, Lasik by itself is safe.\*\*

#### Why should I opt for Lasik?

- **Convenient:** Eliminates the need for cumbersome glasses and to stock up on contact lenses or spare glasses.
- **Long-term cost saving:** No more replacing or repairing eye wear.
- **Security:** Eyesight remains dependable in emergency situations
- **Sports:** Enjoy your favourite games and activities with no inconvenience.
- **Self-confidence:** Look better and feel better naturally.
- **Career:** Occupational flexibility in fields such as military aviation, engineering etc.
- **Travelling:** No glasses or lenses means one less hassle for vacations.

## Customized Lasik

Lasik procedure will normally involve corneal flap creation, where the protective flap is gently lifted using a precise instrument called microkeratome.

After that, Customized Excimer laser is use to reshape the corneal and change refractive power permanently.

### Microkeratome

To create corneal flap

*Combined with (+)*

### Customized Excimer Laser

Wave-front Technology

To correct eye power

## Why Choose Customized Excimer Laser?

Like your unique fingerprints, your eyes are truly one of a kind. Not only does Customized Lasik eliminate the need for glasses and contact lenses, it factors in the unique visual characteristics of your eye with the “Wavefront” technology to measure your eye and its irregularities.

*Customized All laser Lasik*

*Standard Lasik*
